	Project Scope	**Varal lives by it's 'The Key Initiatives' [TKIs] 'Goals' and 'Values'. Links are provided below in the Resource Box.** **It is mandatory to understand them as our automation philosophy which will help you succeed at Varal.** **Context:** As a Software trainee, you will be required to identify or trace the dataflow of End Document fields of our products. You will be working on creating a process flow and English Code [EC] for Actions in the dataflow that you have identified. And finally you will be converting the English Code instruction to Python, Django, HTML, PHP. As we move towards a digital transformation of our company, you will be part of the team helping us to achieve our final goal. The hiring project that we have given below will test your ability to understand project requirements, your data analysing skills identifying data involved and your coding skills in developing an executable project. **Project :** **" Convert the given English Codes in to executable modular programs"** A sample set of information is provided below: [Project data link](#) This link provides you with 3 English Codes which in detail explain the requirement and function of the end program. It includes databases for storage of information, actions to be coded, compliances to be applied, costs and revenues to be added to each field, clocks, accuracy checks and so on. **You are Required to do :** - Understand the program requirements and develop the program as per the English Code document provided in Python/ Django or HTML/ PHP. - Send the finished code to the below provided email : websales@varluae.com - You are required to present the project with maximum of 15 slides and 20-25 minutes explaining the below mentioned details **Your presentation should include the following:**

		1. The presentation must explain the working principle of the project in terms of data, automation principle used and other details of the project. 2. Time and cost estimating to set up the project. 3. Your ideas to improve the project further (scalability of the program).
	Suggestions	● The project should take you 4 to 8 hrs to complete. If it is taking longer please talk to the resource person ● Take advantage of your resource person immediately with questions ● Use this opportunity to find out whether you want to work with Varal ● Show us that you can do what is required by us
	When	You will present your completed project during the final interview
	Where	Video call presentation via Google Meet. You will receive a calendar invite with the date and time.
	Who	You will be presenting to Ravindr Deshpande [CEO] and to Ramapati Singhania [MD]
	How	● Submit your completed project the day before your presentation. ● Slide presentation with links to other documents or sheets if required. Max of 15 slides
	Duration	30 min for Presentation, running your project and Questions & Answers as part of final interview
